

DATA SHEET – FD30 White Primed 1 Panel Shaker

Door :

- **Stiles & Rails :** 38mm thick hardwood stiles and rails , faced with 3mm MDF on both sides (44mm overall)
- **Panel :** 9mm Magnesium oxide board faced with 3mm MDF on both sides. The panels are located into a rebate in the stiles and rails 16mm deep with 11 x 1mm Interdens seals within the rebate. The panel construction successfully provided 30 minute integrity performance in the door tested.
